This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

PREFACE TO THE THIRD EDITION (1880).

In presenting this work to the Mercantile World, I have to express my thanks for the very large support both my former efforts received.

The work is now so well known and highly appreciated that it is unnecessary to do more than point out the following peculiarities of the present Edition:—

1. This Edition contains some 56,000 Code Words, or nearly four times as many as were contained in the first, and more than twice as many as were contained in the second.

2. The Code Words down to the letter "T" consist of words of eight letters only or less. The additional letters in the later words were rendered necessary owing to the liberal response made by the Merchants to supply further sentences in the interleaved copies of my Second Edition, which I distributed through the City for that purpose.

3. Though this has, of course, greatly contributed to the perfection of the Code, yet, recognising the impossibility of making a Code adapted to the numerous and various wants of all, I have rather aimed at improving its adaptability, and have therefore recurred to the plan of my First Edition, and have left alternate pages with blank Code Words throughout the greater part of the book. This gives about 20,000 words available for Special Telegrams.

Special attention has been given to affording increased facilities for Telegraphing Numbers and the minutest fractional quantities and grades.

The Code Words have been selected in accordance with the regulations of the late London Convention, and have undergone repeated revision by competent Telegraph Operators.

The opposite pages of no small part of the book are provided with five columns of Code Words. By heading these with the names of the leading articles traded in, or with different qualities of the same, several thousand Telegrams are at once provided for those specialities, whilst the column of Code Words placed on the same page as the Telegrams may be reserved for general purposes. The Cyphers have been so placed as to make reference easy.

In this Edition I have omitted the "List of Articles and Firms," but have given to each a considerable number of Code Words. It is my intention to group the Articles and Firms, so as to suit those Merchants trading to America, Australia, the Cape, China, or India. These will be published at a nominal price, and can be easily added to the book by the means of the binding "Guards" provided for that purpose.

Digitized by Google

Double Use of Code Words.—In some cases two Telegrams are given to one Code Word. Thus the word "Maltage" from one side would signify, "Buy 1500 —, and ship by steamer," and from the other it would signify, "Have bought 1500 — and shipped by steamer." This plan is adopted in well defined instances only, and therefore no error can arise.

Alternative Readings are also given in some cases, one being placed in brackets—I (we), &c. The Context will be a guide in all cases where this occurs.

In many of the Telegrams given in this Code, the *dash*, &c., is placed in brackets: it is intended to be understood as omitted should no word follow to explain it. In such a sentence as, "We withdraw authority given in our letter (of —)," it would be manifestly unnecessary to give a date if only one letter had been sent to which such a Telegram could apply.

A Unit of Price is referred to in several parts of the Code, and to most Merchants the idea will be intelligible when it is stated that the word *grade* would be equally if not more appropriate, for by this term it is only intended to convey the amount by which the various articles of merchandise usually rise or fall. For Corn it would probably be 1*s.* per quarter; for Silk, 3*d.* per lb.; for other articles 5 per cent., 1½ per cent., &c.; or if in Chinese currency, 2½ taels per picul, &c. The term "Unit of Price" was adopted as suggestive of the desirableness of an agreement on this point respecting every article any Firm using the Code may be interested in.

The Cyphers or figure groups accompanying every Code Word in the Telegram Code afford facilities for transmitting in one word Quantities, Prices, and Qualities, or other particulars of an Offer, Order, Contract, Purchase, Sale, &c. For let it be understood that a Code Word may represent not only the sentence attached to it, but also, under certain circumstances, the number indicated by the figure group that accompanies it; and provision is at once made for giving in one word several conditions of any transaction. Thus one Merchant, after the word "Manacles" (Buy and ship by steamer 450 barrels of flour or other merchandise as per agreement for words on page 433), would make the Code Word "Mutual" (2, 9, 79, 5) read thus: 2, within 21 days; 9, to Glasgow; 79, at 16*s.* 9*d.* per barrel; 5, this is order number 5. The two Code words "Manacles," "Mutual," would thereof read thus: "Buy and ship by steamer to Glasgow, within 21 days, 450 barrels of flour, at 16*s* 9*d.* per barrel. This is order No. 5."

Other particulars can be given in place of these, should they not be applicable to the wants of any Merchant, and I shall be happy to give assistance in working out a plan to meet the special requirements of purchasers of the Telegram Code who may apply to me, stating date and place where Codes were purchased.

Digitized by Google

One addition in the present issue will be of great use to Merchants trading in many articles. Every day in the year is provided with three Code Words—the first giving the date; the second, as per invoice of; and the third, as per quotation of. The facilities thus afforded for describing an order are too apparent to need comment.

Under the head "Sterling," a very large addition has been made, so that this part alone contains about 4,000 Code Words. These words can be used not only to represent Quotations, Prices of Purchases, Sales, &c., but also Numbers and Quantities, as they for the most part will be associated with another Code Word that will indicate the true reading.

The addition of Rupee Currency will, I doubt not, be valued by Merchants trading to India.

In conclusion, I have only to reiterate my willingness to assist purchasers of the Code who may wish to construct Special Tables with the Cyphers. And further, I have to warn purchasers of the Code that spurious copies of my First Edition were in circulation. The alterations were only small, but quite sufficient to give much trouble and cause loss to more than one purchaser.

To prevent any such tricks in future, I have resolved to stamp all copies of the Code with my name in three places. 1st. On the title page. 2nd. At the end of the Preface. And 3rd, on page 1.

Gierwolf	19676	Sales commenced today (or on —). Attend. good. Biddings animated. Slight advance on last rates. Good scoureds fully up to last sales rates	Low medium scoureds	most in request on which we quote advance of ½ per lb	Fleece	no change	Grease	no change
Gietblad	77	" "	½ better	"	½ — 1	"	—	" —
Gieten	78	" "	½ — 1	"	"	"	—	" ½
Gieterig	79	" "	no change	"	"	"	—	" —
Gietoven	80	" "	1 — 1½	"	"	"	—	" —
Giffone	81	" "	½ — 1.	"	1 — 1½	"	—	" —
Giflames	82	The advance that has taken place during the intervals of the Sales has not been fully established. The Sales opened to day (or on —) with an advance of ½ — 1 only.						
Giflant	83						1 — 1½	"
Giflasse	84						1½ — 2	"
Giflerai	85	Sales commenced today (or on —). Attendance fair, but no improvement in prices. On the whole the general opinion is that last sales rates were fully maintained, in some instances ½ per lb better, in others ½ lower.						
Giflerez	86	Sales commenced today (or on —). Attend. fair. Biddings not spirited. Prices a shade easier without any quotable change of value.						
Giflions	87	" Good scoureds ½ lower.	Low medium	about last sales quotate	Fleece	no change	Grease	no change
Gifted	88	" ½ — 1	"	½	"	½ lower	"	—
Gigantic	89	" no change	"	½	"	½ — 1	"	½
Giganton	90	Since commencement of Sales prices have increased may now be quoted at about opening rate.						
Giggling	91	" advanced						
Gigliato	92	" fallen						
Gignunt	93	Prospects for next sales good						
Gigojoga	94	" bad (see also: Gestade)						
Gigotte	95	Closing rates of last sales fully maintained						
Gigua	96	" barely "						
Gijbelen	97	Sales closing very firm						
Gijblok	98	" " weaker						
Gijzelen	99	Public sales commence on — comprising — bales of which — are Cape						
Gilder	19700	From the general appearance of trade and from the operations in Turkey Mohair seems to be on the move and there is every prospect of prices being higher than they have been for some months past. We recommend you to purchase if you can do so at about same rates as your shipments now on hands of about same average *
